NIGHTRAYS SEES CONTINUED GROWTH IN 2008

New Client Contracts Up 33 Per Cent

HOUSTON – September 4, 2008 – In a strong start to the year, NightRays, a leading teleradiology provider, is gaining significant momentum toward achieving its new business goal for 2008. In the first six months, NightRays has increased client new contracts by 33 per cent over last year's figure, creating a solid foundation to expand the company's clientele this year.

"So far, 2008 has been a stellar year for us," said Dr. Greg Rose, president and CEO of NightRays. "We've set a lofty goal for ourselves with a very high growth number, and the fact that we're already performing so well assures us that it was a good decision."

Regions that have seen new growth this year include: Arkansas, Mississippi, Pennsylvania, Oklahoma, Ohio, as well as, Austin, Dallas and Houston in Texas. Recent agreements with VHA Oklahoma/Arkansas and VHA Pennsylvania will only strengthen NightRay's presence in those regions.

"After evaluating several key players in the teleradiology field, we felt that our best option was to move forward with NightRays," said John B. Lieblong, chief executive officer and administrator of Associated Radiologists LTD. "NightRays has an impeccable record of providing quality service, efficiently, and provided a customized solution to meet our radiology needs."

NightRays, with corporate offices in Houston, Dallas and Seattle, is a leading teleradiology company that provides full-service support to medical facilities, physicians and imaging centers by reading scans and providing accurate, reliable reports around the clock. NightRays offers customizable services, U.S. based physicians that are ABR certified and a patented approach to teleradiology that effectively leverages the resources of a local medical facility to streamline physicians' workflow.

###

About NightRays

NightRays is a more complete alternative to most after-hours and daytime radiology services, offering remote radiology consultations to a wide variety of imaging and hospital clients. With patents pending on 27 advances in teleradiology technology, competitive pricing and its hallmark tracking system, NightRays is on the forefront of teleradiology services that give radiologists and clinicians solutions to the many obstacles of managing and operating a radiology business.
