NIGHTRAYS ANNOUNCES REGIONAL AGREEMENT WITH VHA

HOUSTON – June 30, 2008 – NightRays, a leading provider in teleradiology, announced an agreement with the VHA Oklahoma/Arkansas regional office as the preferred provider for teleradiology services. Under the agreement, NightRays, PA, provides VHA member healthcare organizations teleradiology services such as final and preliminary professional interpretations, a radiology information system, archiving, voice recognition dictation and a host of additional professional services.

VHA, based in Irving, Texas, represents a network of more than 1,400 health care organizations, including 21 percent of the nation's leading community hospitals that serve 26 percent of the nation's patients. A performance improvement company, VHA provides information, products and services to help these organizations improve community health, clinical effectiveness and operational efficiency. VHA alliance have 16 area offices that serve as hubs for the delivery of national VHA programs, but the offices also develop their own set of services and programs, which are tailored to meet specific demands of the members in each region. The Oklahoma/Arkansas regional office represents more than 40 acute care facilities across the two states.

"NightRays has been a great partner to work with in providing teleradiology services to our member organizations in VHA Oklahoma/Arkansas," said Scott Snider, Vice President of Market Management for VHA Oklahoma/Arkansas. "Not only have we received positive comments regarding their great service and responsiveness, but also and most importantly, the quality of the reads that they are delivering to our member organizations. This confirms their passion from day one...it is all about the patient."

"VHA is well known in the industry for delivering value to its members by analyzing the market and providing the best solution, and we're excited to be working for them," said Greg Rose, M.D., President and CEO of NightRays. "With VHA's endorsement of our teleradiology services, we're positioned to offer innovative and customizable solutions to many of the leading hospitals in Oklahoma and Arkansas."

NightRays is a leading teleradiology company that provides full-service support to medical facilities, physicians, and imaging centers by reading scans and providing accurate, reliable reports around the clock. NightRays offers customizable services, U.S. trained and based medical doctors that are ABR certified and a patented approach to teleradiology that effectively leverages the resources of a local medical facility to streamline physicians' workflow.
